

PRODUCT INFORMATION

Seasol plus Nutrients Roses & Flowers

Seasol plus Nutrients Roses & Flowers is a pelletised plant and soil treatment boosted with fast-acting fertiliser for all roses and flowering plants.

INSTRUCTIONS FOR USE

Seasol plus Nutrients Roses & Flowers is a rich source of seaweed, nutrients, trace elements and natural composts to revitalise soil health and promote growth in all roses and flowering plants.

It delivers a special blend of nutrients and trace elements to help promote healthy growth without excess foliage and flowering.

Extra potassium, iron, magnesium and calcium promotes healthy budding and flowering for beautiful blooms.

Seasol plus Nutrients Roses & Flowers is boosted with seaweed to promote root growth and help reduce environmental stresses. Natural compost and organic matter enrich the soil to improve soil moisture and nutrient retention.

DIRECTIONS FOR USE

Seasol plus Nutrients Roses & Flowers can be applied any time, generally every 6 to 8 weeks or as needed. For established roses and flowering plants apply 100 grams per square metre or follow the application table below for more specific rates.

Mix into the topsoil and water it in thoroughly after application.

USAGE TIPS

Seasol plus Nutrients Roses & Flowers is the perfect partner for any garden project applied throughout the year.

- ✓ Apply **Seasol plus Nutrients Roses & Flowers** to established roses or flowering plants to keep them happy and healthy with beautiful blooms.
- ✓ To keep roses & flowers in full bloom, deadhead spent flowers and prune blooms for a stunning vase display inside or give to family & friends.
- ✓ Apply to the base of the hole and backfill soil when planting roses or flowering plants. Water it in with **Seasol** to aid plant establishment.
- ✓ Apply it in the cool of the day, early morning, or late in the evening. Water it in thoroughly to ensure water is going down to the plant's roots.
- ✓ It is not recommended to apply when temperatures are above 25°C.
